Instructions to Authors

I. Character and Type of Journal

1. Original papers submitted to the journal should deal with significant areas of physical therapy and exercise physiology.
2. Details of the study area are classified as follows.
   (1) Neurological Physical Therapy
   (2) Orthopedic Physical Therapy
   (3) Based Physical Therapy (Biomechanics, Motion Analysis, Measurement and Evaluation, Brain Science, etc.)
   (4) Base Laboratory Science (Anatomy Physiology, Neurophysiology, Exercise Physiology, Histopathology, etc.)
   (5) Policy and Administration of Physical Therapy
   (6) Other Clinical Areas (Cardiovascular and Pulmonary, Geriatric, Skin, Obesity, etc.)
   (7) Other Rehabilitation Areas (Sports Rehabilitation, Occupational Therapy, Orthoses and Prosthesis, Rehabilitation Engineering, etc.)
3. Article types accepted are: Original Article, Review Article, Technical Note, Book Review. The associate editors decision regarding acceptability of the manuscript.
4. Original papers will be accepted for publication with the understanding that they have not been published previously, nor are under consideration for publication, in any other journal.

II. Submission Requirements

All authors specified by the Korean Society of Physical Therapy dues must be paid a full member. However, if you are not a physical therapist must become a associate member. Paper, the authors review the progress of the membership of any payment has been completed and if begins.

III. Language

1. Should be written in Korean or English. Translation of medical terminology based on the use of a new term physical therapy and physical therapy textbook glossary of term is used. Other terms of the Medical Association 2001 revised fourth edition shall be subject in the revised medical terminology.
2. When writing Korean papers if you do not have proper translations of medical terminology, proper nouns, sports, treatment and test methods, units, etc. are used as original language.
3. With translations, but the meaning is not clear if the term is used as the first translations in parentheses in the original language is indicated by the following. Only translations is used thereafter. On terms that are commonly used in English notation should be avoided.
4. When writing English papers, English abbreviations used to minimize. Initially used as the source language and then use the abbreviation in parentheses. After only abbreviations is used.

IV. Examination of Journal

Authors of submitted manuscripts may recommend three qualified reviewers who are not members of their institutions and who are not collaborators. Reviewers comments and the associate editors decision regarding acceptability of the manuscript. Authors are generally required to revise their manuscript before formal acceptance of the paper for publication.
V. Content of Manuscripts

1. Abstract: Outlining the Purpose, Methods, Results, and Conclusion of the paper. All publications will be in English, not exceeding 250 words and key words (up to 3).

2. Introduction: Include a list a background review of the experimental design of your study and the measurement techniques used, citing salient literature. Conclude with the hypothesis in involved and/or the purpose of the investigation and how it will address deficiencies in existing knowledge.

3. Materials and Methods: Enough detail must be given in Materials and Methods so that others may repeat your work. Identify the number of times individual experimental treatments and the number of times individual experiments were duplicated. For standard methods, describe in adequate detail those procedures that have not been fully described in cited publications. List model number and sources of equipment and media. Include statistical analysis.

4. Results: Report the results of your study here; reserve your interpretation of the results for the discussion section. Present results concisely in the text and any accompanying tables and figures, if necessary. Avoid extensive use of graphs; tables are often more effective.

5. Discussion: The purpose of this section is to interpret the results in relation to previous literature, to proposed explanations for the results observed, and to discuss possible applications. Avoid speculation unsupported by the data obtained.

VI. Notes on Review and Case Report

1. Review: The science editor assigns each manuscript to an associate editor, who will be identified to the author.

2. Case Report:
   (1) Abstract: All publications will be in English, not exceeding 200 words. Unlike original papers does not separate section should be written in one paragraph.
   (2) Introduction: Generally associated with a case briefly describes the background and significance.
   (3) Case Report: Concise and directly related to a case described only part.
   (4) Discussion: To highlight a case of focusing on parts, tedious literature should be avoided.
   (5) References: reference (down to 15)

VII. Author's Checklist

Manuscripts should comply with the following provisions. If incongruity manuscripts on guidelines send back, and in this case, the manuscript must be received by modifying the back.

1. General Information
   (1) Manuscripts was used earlier with 2003 version MS word, certainly that was written to providen manuscripts form by Korean Society of Physical Therapy website. Manuscripts cannot exceed 10 pages except abstract and reference.
   (2) Editing the paper: A4 paper is used to download the manuscripts form, use the default values.
   (3) If contribute the article written in English was present an English sentence reform certification.

2. Cover
   (1) Title of manuscripts was described Korean and English title. Korean title was described within 30 characters, English title was described within 20 words.

If the primary word was article, primary characters of article described to capitalize, and describing a case with subtitles, of wood at the end with a colon (:) after displaying the first letter of first word capitalized, and the rest is all lowercase.

www.kptjournal.org
(4) Number of pages, number of tables, figure number, the number of references to be described.

3. Authors Information and Paper Appearing Agreement
   (1) Author's names and affiliations Present the authors' affiliation addresses (where the actual work was done) below the names. Indicate all affiliations with a lowercase superscript letter immediately after the author's name and in front of the appropriate address. Provide the full postal address of each affiliation.
   (2) Corresponding author Clearly indicate who is willing to handle correspondence at all stages of refereeing and publication, also postpublication. Ensure that telephone and fax numbers are provided in addition to the e-mail address and the complete postal address.
   (3) Before the accepted manuscript is published in an online issue Requests to add or remove an author, or to rearrange the author names, must be sent to the Journal Manager from the corresponding author of the accepted manuscript and must include: (a) the reason the name should be added or removed, or the author names rearranged and (b) written confirmation (e-mail, fax, letter) from all authors that they agreed with the addition, removal or rearrangement. In the case of addition or removal of authors, this includes confirmation from the author being added or removed. Requests that are not sent by the corresponding author will be forwarded by the Journal Manager to the corresponding author, who must follow the procedure as described above. Note that: ① Journal Managers will inform the Journal Editors of any such requests and ② publication of the accepted manuscript in an online issue is suspended until authorship has been agreed.

4. Abstract
   Abstract should be described English and continuously under subheadings of Purpose, Methods, Results, and Conclusion, not exceeding 250 words. The abstract should not contain abbreviations or references. Keywords include more than three. The purpose of these is to increase the likely accessibility of your paper to potential readers searching the literature. Therefore, ensure keywords are descriptive of the study. Refer to a recognised thesaurus of keywords wherever possible.

5. Text
   (1) Font and paragraph form will accept the downloaded paper form.
   (2) Manuscript is in the following order: Introduction, Methods, Results, Discussion, References, tables, figure and figure description.
   (3) Step number of text: 1., 1), (1), ① should be in order.
   (4) Description of the equipment used in research on the text is described as follows.
      ① Used equipment (Equipment name, manufacturer, country)
      ② Equipment name and manufacturer in accordance with the manufacturer's notation can be displayed in English and Koreans or country should be listed in Koreans.
   (5) Study subjects for the experiment in the way of acceptance must be included (except animals).
   (6) ① General method cited
      · If your citation one: ... It was reported to be.
      · If you have two citations: ... It was reported to be.
      · If more than three citations: ... It was reported that.
      · 3 or more consecutive citations: The report that was...
      ② When describing a person's name
      · If the author who is one: Kim, Duncan is...
      · If the author who is 2: Hwang and Lee are, Seitz and Rossini are
      · If more than three authors: Park et al, Katz et al without inserting tables and figures in the text of references should be written in a separate page at the back. The position of tables and figures in the text should be listed as follows.
      · ... Displays the results were found (Table 1) (Table 1, 2) (Table 1, Figure 2).
      · ... Results showed (Figure 1) (Figure 1, 2) (Figure 1A) (Figure 1A, 1B)
6. References

(1) References must be written to only citations in the text.
(2) Indicate references to the literature in the text by Arabic numerals that consecutively through the paper in order of their appearance, and the number of references should be limited not more than 15 units and less than 40.
